Mines and Prospects -- Furnaces and Mills

Smelter Officials Coming to Town

Manager Whiteley of Local Furnaces Leaves to Receive Them at Colorado's Capital.

Charles W. Whiteley, manager of the American Smelting & Refining company's Interests in this district is on his way to Denver where he will next week be joined by Daniel Guggenheim and other officials of the company. With the party, Mr. Whiteley will return on Wednesday. Mr. Guggenheim, who is chairman of the executive committee, and his party comes West this time for the purpose of mak-West this time for the purpose of making the annual inspection of local plants and to make an inventory of things that may be needed in anticipation of next year's requirements in the world of smelting. It is not unlikely that during his sojourn here he will release definite information concerning the proposed new smelter in this valley of which Vice-President Burton Sewall told on his recent visit. According to Mr. Sewall the new plant will equal in magnitude, and perhaps exceed in capacity the imposing one now operated by his company at Murray. The cost of the second to reach in all probability a million delairs. Among others in Mr. Guggenheim's party is Traffic Manager Eccles and Williard E. Morse, whose reception here will be made a cordial one.

ALONG THE SAN PEDRO.

Some Slumbering Resources That Are Now Being Aroused.

Discussing the benefits that Lincoln county will derive from the Salt Lake Route, now forging its way through that region, the Lode, of De Lamar, Nev. ealle attention to a number of camps that have been slumbering for years on ores that, with fransportation, will be made to afford "good money" to the owners. In Irish Mountain district, says the Lode, three stamp mills were at one time in profitable operation, while even after the cadence of the camp set in a shipment of ore was sent to Pioche, which was settled for on contracts showing as much as 552 ounces silver per ton. Another shipment ran from 236 to 350 ounces, and was also marketed at Pioche. There was a number of other properties that showed good values, but the owners were unable to put in the requisite machinery, and the camp has been idle for about sixteen years. calle attention to a number of camps that

From the old camp of Limpahute two miners took a shipment of ore to Eureka. Nev., for which they received \$2009 after an expense that was enermous. Seven miles West is Preck-a-boo, in which the Nesbitt brothers are deeply interested. Althought but little has been done except assessment work, ore running as high as 400 ounces silver has been found. The Hidden Treasure, owned by Sharp. Richards and Sheriff Johnson yields samples running as high as 200 ounces silver, \$20 gold and 25 per cent lead. A number of likely looking prospects have been located, and it is no far-fetched belief that before many years there will be an awakening in that locality and a prosperous camp established. It will be noted that in all these cases except one, sliver was the only metal found. The reason is not far to seek.

MAY GET SMELTER.

Examination of Bettles Copper Mines Looking to a Plant.

Advices from the west indicate that the properties on which Alex Bettles and others recently executed an option in favor of Montana talent and that are located out of Sodaville, Nev., are to be equipped with furnaces with which to reduce the copper-bearing ores. To that end W. W. Wishon and W. A. Stevens end W. W. Wishon and W. A. Stevens have left Goldfield for Sodaville, says the News of the former camp. If the result of their examination is favorable and a good supply of base ores assured it probably will not be long before ground will be broken for a large smeiter at Sodaville. S. J. Gormley, superintendent of the Anaconda, Mont., smelter, the largest in the world, will be associated with Wishon & Stevens in the new venture if it goes through. As a smelterman Mr. Gormley has few superiors, and his connection will strengthen an already strong combination.

The News is in possession of facis which indicate that the wrangle among the Jumbo cwners may soon be brought to an end, a consummation devoutly to be wished. The injunction which shut down the McDonalli-Fuller lease has been dissolved and work is again proceeding.

dissolved and work is again proceeding.

Two hundred and eighty sacks of ore going better than 5500 per ton went out from the Lewis-Richard lease on the St. Ives this week. George McClelland has also shipped over 200 sacks.

ASSESSMENT WORK.

But Four Weeks Remain in Which to Preserve Locations.

In which to do assessment work those who have neglected it until this hour have less than twenty-eight days. This is ample time, however, in which to complete and to preserve their locations. its timely admonition to the locator the Press of San Francisco says:

Those who, at the end of the year, find themselves unable to complete it, need feel no fear of losing their claims if they are at work during the last days of December and finish the work for 1894 by continuing the work after January 1, 1995. It will not suffice to stop with the \$100 worth of work uncompleted. Claims located during 1894 do not require assessment work for this year, except in those ment work for this year, except in those located during 1994 do not require assessment work for this year, except in those States were the State or Territorial laws and regulations demand it, but all claims located during 1994 must be "represented" in 1995 by the performance of 1000 worth of work, or the installation of substantial improvements to that amount. Where a locator falls to do the work required by the Federal, State and local laws he cannot take advantage of his own negligence and re-locate the claim, as he might continue to do this on a number of claims for an indefinite number of years, thus defeating the purpose of the law, which is to develop the mineral resources of the country.

FROM BIG INDIAN.

Future Operations at the Big Copper Mine in Grand County.

Of the significance of his recent visit to the copper-bearing properties of the Big Indian Mining company, in Grand county, out of Moab, Col. C. E Loose, county, out of Moab, Col. C. E. Loose, who reappeared in town yesterday afternoon, pleaded that he had nothing whatever to say at this time. It is, of course, the impression that operations there will be resume das the advance in the price of the red metal justifies.

Of the Grand Central of Tintic, of which he is the general manager, Col. Loose said he had not had time since his return to inquire into conditions down there, nor was he prepared to discuss a December dividend. He left for the south sgain last night. THE DAY ON 'CHANGE.

The Bears Again Offensively Active All Along the Line.

The day on the mining exchange closed on the sale of 30,440 shares of stock for 36722.75 and with the shorts again prinipally aggressive. The raid on May Day that had shown itself a veritable glut ton in the punishment it had swallowed for several days, was renewed and although it was at one period reduced to 20%c, it rallied and brought 22%c with the last transfer at 21c. Blue Bell, the output of which now compares favorably with the average Tintle producer, found a number of customers at its counters and wrapped several parcels to bids of 90 cents, while Columbus changed hands at \$1.35 with Con Mercur reduced to 25c. Tetro was severely dealt with and flattened out to 18 cents, while Carisa came out to a bid at 13%c and South Swansea at \$c. Lower Mammoth was sold at 17% cents and Yankee Con, at 37%c, while a bunch of 500 Little Chief came out to a bid of 2% cents, the day clesing on the following market: though it was at one period reduced to

Made Big Record at the New Mill

November's Output at Copper Co.'s Plant-Over 20,000 Feet of Work, All in Ore.

At the Utah Copper company's big mill in Bingham canyon the November output copper, gold and silver-bearing concentrates, and, while the management has not consented to take other than the not consented to take other than the shareholders into its confidence, it is said that the value of this tonnage will approximate \$100,000, with this record to be exceeded the present month. To produce this volume of concentrates, from which it is claimed that a reasonably fair dividend on the moneys invested has been earned, about 18,000 tons of copper, gold and silver-bearing porphyry was reduced. With the demonstrations that nave been made in this, the first unit of the stopendous plant that will have been erected before the final equipment of the undertaking has been accomplished, the management will no odubt in a short time recommend that the construction of units that are to follow begin. The officials who recently investigated conditions are as easer as is the local management, perhaps, to proceed with the projected enlargement, and the order to go ahead with them probably will issue at the first meeting next year. To encourage them in this a tonnage of ore is now blocked out that is well-nigh exhaustless. The enormity of this deposit is reflected in the fact that of \$22,000 feet of underground work not a foot of it has been prosecuted except in copper, gold and silver-bearing porphyry. Ultimately are equipment of the Utal. Copper company's undertaking will be made to reduce no less than 6000 forms a day. shareholders into its confidence, it is said

AT THE BECK TUNNEL.

Now Sinking to Tap New Channel at Greater Depth.

Uncle Jesse Knight to whem more than any other Godiva Mountain at Tintle is indebted for its prominence, and who is now making intelligent endeavor to add another to its roster of producers, came up from the properties of the Builion-Beck Tunnel company yesterday morning and departed for his home in the South last right. Of his latest undertaking in that locality Manager Knight says that he is now sinking to undermine the ores that were recently encountered in a raise above the fissure through which the tunnel has passed. The ore bunches and with it in place active production will soon begin.

it in place active production will soon begin.

The company has a large amount of territory and as the miner who contributed the Uncle Sam and Humbug to the ilst of Tintic producers, he has no doubt in his own mind of his ability to add Beck Tunnel to them.

Discussing the future of the Salvator, which has also been made to afford him and his associates bread money. Mr. Knight says that an effort will be made to get under its ore bodies through the upper tunnel on the La Reine ground. The upper workings in the Salvator were productive of some very high-grade ore and the record should be repeated below

RECEIVER FOR NAMPA.

Company's Mines and Mill in Idaho Come to Grief.

Come to Grief.

On the application of Roy C. Preston and McCornick & Co., of this city, the estate of the Nampa Mining company, consisting of mining properties and a mill on Miller Mountain. Ida., has been placed in the hands of a receiver, the petitioners claiming that the respondent is indebted to them in the sum of \$2.02.64, with other obligations that increase the indebtedness to over \$20.000. The Boise Statesman says: "It was represented that the appointment of a receiver to care for the property would be of great benefit not only to the creditors but to the stockholders as well, of which latter class Dustain is one. Complying with the request made, Judge Stewart appointed M. A. Regan of Boise as receiver, and this gantieman is now in charge of the property."

The company, which was founded by Joseph Oglesby of Salt Lake and his associates, is a youngster that begun is carrier under not favorable auspices, and with properties in which not a little gold-bearing ore was revealed. Some time ago a small mill was put in commission, and that the undertaking has come to grief, many express astonishment.

Boston Copper.

Boston Copper.

BOSTON, Mass., Dec. 2.— From the opening today copper shares have continued in good demand, especially the Utah properties. There was a drive or two made at some of the specialties but sharp recoveries generally followed. The tone is decidedly bright and much higher prices talised all around. The buying today has been of the best character, while a good deal of the selling came from people who wished to take profits. The closing was strong.

Volume of Wealth **Astonishes President**

Ore Bodies Opened Up in Lark and Lead Mine Ledges a Revelation Scarcely Expected.

With the developments that have been prosecuted and the wealth of ore that has been exposed since he last investigated the Dalton & Lark group of mines it Bingham, President E L. White of the Bingham Con, has returned to the ocal offices confessing his astonishment and throwing all kinds of bouquets at the feet of the local management. The achievements in the group, which is but one of the assets of the main company, have demonstrated, said the president yesterday, all and mach more than was foretold by Manager MacVichle when he admonished the company that, under an aggressive policy, it would be amply repaid. The long drain tunnel is an absolute success. It has unwatered the upper levels, left them as dry as a bone and rendered the campaign of development most inexpensive. Indeed, it is through that avenue that the Dailon & Lark group, so long submerged, has been reclaimed. The character of the rock through which thus tunnel is now pushing its way has changed materially during the last few feet. The breast of it shows signs of mineralization, while the management feels that it is now rapidly approaching an ore body at a depth greater than has ever been attained in the search for ore that locality. It will tap the Lark ledge about 400 feet below the maximum depth, which has now been reached, and with 300 feet of back-stope above this horizon and 400 feet between it and the tunnel level, the possibilities that are opened are no less than enormous. At present the management is drawing on this ledge for 250 tons of ore daily.

The change at the Lead Mine group chievements in the group, which is but

mous At present the management is drawing on this ledge for 250 tons of ore daily.

The change at the Lead Mine group has been just as prenounced, all of the ore now exposed in that channel, said Mr. White, having been opened up since he visited it in July last. Indeed, the developments in the ore body of the Lead Mine vein have all been achieved during the past six weeks, and, while a very large tonnage of mineral is now exposed, the extent of its resources is undetermined. President White pleaded that he was unable to discuss intelligently changes that have taken place and ore bodies that have been revealed in the Brooklyn and Commercial mines, as his investigation had not extended to them. At the smelter he found the furnaces, of which there are five, all in operation. The latest record at the plant showed an output of 50,281 pounds of copper buillion, containing gold and siliver, for a single day. That this will be exceeded in a short time, however, there is no shadow of doubt. President White left for the smelter again during the afternoon, and from there will proceed to Hingham, where his inquiry into the company's resources will be continued. His observations there at an end, his pilgrimage will be extended to Tintic, where he will inquire into conditions at the Eagle & Blue Beil, of which his company exercises the control, and conditions at the Grand Central. In which his company has a large block of shares.

John W. Longley, broker and niner, came in from the East again Thursday, after inter-reting its talent in Western undertakings, He reports the interest in the camps steadily in-tensing.

The management of the Carlin of Tintle is at the sampler with 150 tons of scond-class ore and a carload of crude from the latest strike, the latter promising an average of 30 per cent in the red metal, without reference to gold and silver.

TEA

Do most of the great tea merchants cheat?

What do you mean by cheating? They don't call it cheating.

Your grocer returns your money if you don't like

For the Preparation of the Dainty Luncheon

We suggest our Manning & Bowman special porcelain or enamel Teapots and Bowman & Manning chafing dishes, with special porcelain pans.

They are cleanest and give best service.

TREAT and CURE CATARRH and all curable diseases of the eye, ear, nose, throat, lungs, atomach, liver, howels, kidneys, bladder and all chronic, nervous and private discusses of both sexes, and discusses of children.

Home Treatment Cares. Write for free symptom list if you ean-not call. Consultation Free.

DR. A. S. SHORES Special Offer In Private Diseases Unfortunates, of both series, who are suffering from Private Diseases—whether caused by impanse, crosses or contagion—have always been looked oppon as legitimate pury by the Sharts at Charlatans who pone as "Receivains" and rob the sufferer for worthless treatment. The SHORES DO NOT ARK YOU TO PAY THEM ONE DOLLAR UNTIL CURED—URLE TOU WISH TO YOURSELF.

DRS. SHORES KNOW THEY CAN OURE AND DO GURE PRIVATE DISEASES IN BOTH SEXES PREMARKELY, and to PROVE their skill, in this case of miments, nor treatment of such cases before the putient is required to pay Drs. Shares' one dollar. Or those who private may pay the fee in small weekly or mouthly installments as the core progresses. THIS HORES PLAN OF DEALING WITH THE ANTILICIED, deals a deach blow to the Quack and Pake the Genands all Cash, in embalage for empiry promises. DM you were been of a Fahir refunding poony to a duped putient! Take no chances—you cannot look your money if you don't pay it est influents of the contract of Walkinships of the way in the contract of the trouble. We are those the old and assense place in family the contract of the trouble. We our LOST MANHOOD, Seminal Weakness, Spermatoribed (GONORRHOKA, SPIFILLE, VARICOURLE and KING-ton short for the trouble. We our LOST MANHOOD, Seminal Weakness, Spermatoribed (GONORRHOKA, SPIFILLE, VARICOURLE and kinded shoubles, then time and for immoney, then any institution in the west, every case is confidental—we never use a name of being a secret.
